QUALITY, COMPASSIONATE CARE

Preventative Care  
 Wellness Plans

*Save money & pay monthly for  
your pet's essential preventative  
care with our Pet Health Plans*

## **WHAT IS A WELLNESS PLAN?**

Our Wellness Plans are designed to provide annual preventive care for your pet. They include examinations, vaccines, early screening diagnostics, deworming & discounts on services! In addition, either a professional dental cleaning or spay/neuter anesthetic procedure is included.

## **HOW ARE THEY DIFFERENT THAN PET INSURANCE THAT I ALREADY HAVE?**

Our Preventative Care Wellness Plans do not include treatment for unpredictable or abnormal conditions, however discounts apply on all services, treatments, and medications. Because pets need ongoing preventive care, wellness plans automatically renew at the end of each 12 month period (unless on a puppy/kitten plan).

## **HOW DO WELLNESS PLANS WORK?**

Each Wellness Plan includes a bundle of preventive care services and discounts that have been designed to meet the needs of your pet. At the 1st visit, we'll assess your pet's overall health and provide the first set of diagnostic tests, vaccines and deworming to protect them against a wide variety of diseases and infections. Over the course of the year, we will provide all of the treatments & procedures that are included in your plan. For your convenience, you can drop your pet off at the clinic for their visit; we'll provide the veterinary care your pet needs while you get back to your busy day and we'll schedule a pick-up time toward the end of the day.

## **WHY DOES MY HEALTHY PET NEED A WELLNESS PLAN?**

All pets, need regular, ongoing preventive care to stay healthy. Pets can hide problems & pain, so ongoing preventive care is important at any age. Young, adult pets also need regular veterinary care for protection against parasites, infections and diseases. Our wellness plans include an established schedule of care that's just right for your dog or cat. In the examinations, we will initiate diagnostic testing to identify and treat issues early, before they become more serious and harder to address.
